REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1: The prior art of record neither shows nor suggests a slider connector unit having a connector and being shifted by pushing of a recording medium, in combination with a slider connector lock unit part.

Regarding independent claim 2: The prior art of record neither shows nor suggests a recording medium loaded by inserting the recording medium toward a loading position under a status where the terminal is connected to a connector of the recording medium apparatus, in combination with a lock part operating based on a common dimension part.

Regarding independent claim 5: The prior art of record neither shows nor suggests a connector connectable to a terminal of a recording medium, in combination with an operation stop part, when a portion opposite to an insertion direction of the recording medium reaches a predefined position regardless of a length of the recording medium with respect to the insertion direction, stopping an operation of a recording medium load part.

Regarding independent claim 6: The prior art of record neither shows nor suggests a connector connectable to a terminal of a recording medium, in combination with an operation stop part detecting a common dimension part of the recording medium and stopping an operation of the recording medium load part.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
